TOPIC 2 · 15 MIN · SLIDES · SHEETS

Lab 6: Slides: Build the Client Deck from Your Sheet

> Six slides, your logo and a live chart from your own dashboard, in one request.

Your goal

Develop a client deck that draws on the approved inventory and integrates a Sheets chart (LO2).

The story so far

A client meeting is coming, and you want a short capability deck. Same facts as the website, same voice as your emails, and your real numbers on slide 5.

You will deliver

☐ Northstar-Capability-Deck in Slides: 6 slides with the Sheets chart

Before you start

A personal Google Account on Google AI Pro or Ultra, age 18+, Keep Activity and Personal Intelligence on. A laptop with Chrome. Copy every prompt from labs/prompts.html, or from the course prompts page: https://tertiarycourses.github.io/C1259-AI-Agents-with-Gemini-Spark/labs/prompts.html

Your mock data

File in data/	What it is
northstar-content-inventory.csv	Approved and prohibited claims. Spark may only use these.
deck-brief.docx	The six-slide capability deck, slide by slide.
assets/northstar-logo.png	Fictional logo.

Steps

Step 1. Build the deck (9 min)

Where: Gemini → Task, then Google Slides

Attach deck-brief.docx, the logo and the inventory, then paste the prompt.

PROMPT · COPY FROM THE LAB PROMPTS PAGE

```
@northstar-writer Create a Google Slides presentation named Northstar-Capability-Deck in
my Gemini Spark Workspace/Northstar folder, following the attached deck brief.
Add the attached logo to the first slide. Add the enquiries chart from the Trend tab of
Northstar-Launch-Dashboard to slide 5.
Use only approved claims from the inventory. No prices. No promises of results.
```

Expect: Six slides, the logo, and the real Sheets chart on slide 5.

You decide: Read every slide as a client would.

Step 2. Ask for one concrete change (6 min)

Where: Same task thread

Pick one thing to change, and check Spark changes only that.

PROMPT · COPY FROM THE LAB PROMPTS PAGE

```
Shorten the title on slide 2 to six words or fewer. Change nothing else, and tell me what
you changed.
```

Expect: Only that title changes.

Checkpoint

Six slides, the logo, the Sheets chart on slide 5, and no price or results promise.

If you finish early, or after class

• Ask Spark to add speaker notes to each slide, using only the inventory.

If Spark does not behave as described

Menus move and results vary, so this lab states what to expect and not exact wording. Check the source in Google Help, tell your trainer, and record what you actually saw. No Pro or Ultra account in class? Pair with a neighbour and complete the Docs, Sheets and Sites templates by hand.

All company data in this lab (Northstar Studio, people, enquiries, reviews, numbers) is fictional and generated for training.
