Lab 9: Skills + Schedules: Weekly Posts with a No-Overlap Rule

> Click Run now twice. If the second run stops itself, your rule works.

Your goal

Save a content skill, schedule it, and prove a no-overlap rule (LO3).

The story so far

Three LinkedIn posts a week, and you will not remember. Spark drafts them every Monday, stops if the file already exists, and publishes nothing.

You will deliver

- ☐ northstar-content skill
- ☐ A Monday schedule
- ☐ A completed schedule specification

Before you start

A personal Google Account on Google AI Pro or Ultra, age 18+, Keep Activity and Personal Intelligence on. A laptop with Chrome. Copy every prompt from labs/prompts.html, or from the course prompts page: https://tertiarycourses.github.io/C1259-AI-Agents-with-Gemini-Spark/labs/prompts.html

Your mock data

File in data/	What it is
northstar-content-skill.txt	Paste this into Create manually on the Skills page.
content-calendar.csv	Themes for the next four weeks.
schedule-spec-template.docx	Trigger, time zone, skill, output name, no-overlap rule, rollback owner.

Steps

Step 1. Save the skill (2 min)

Where: Customize → Skills → Create → Create manually

Paste the name, description and instructions from northstar-content-skill.txt.

Expect: northstar-content appears on your Skills page.

Step 2. Schedule it and run it twice (6 min)

Where: Gemini → Task, then Scheduled

Attach content-calendar.csv and paste the prompt. Go to Scheduled, hover, click More → Run now. When it finishes, click Run now again. Fill in schedule-spec-template.docx from what you set.

PROMPT · COPY FROM THE LAB PROMPTS PAGE

```
Every Monday around 9 AM Singapore time, use @northstar-content to draft next week's three LinkedIn posts from the attached content calendar.
Save them in a Google Doc named Northstar-Posts-YYYY-MM-DD in my Gemini Spark Workspace/Northstar folder.
Before you start, check for a Doc with today's date. If it exists, stop and tell me. Do not create a second copy.
Never publish or send anything.
```

Expect: One Doc with three posts. The second Run now stops and creates no second copy.

You decide: Posts stay drafts until you approve them. That is your approval gate.

Checkpoint

The second Run now stopped at your rule and created no second copy.

If you finish early, or after class

• Ask Spark to add each post's claims and sources as a table.

If Spark does not behave as described

Menus move and results vary, so this lab states what to expect and not exact wording. Check the source in Google Help, tell your trainer, and record what you actually saw. No Pro or Ultra account in class? Pair with a neighbour and complete the Docs, Sheets and Sites templates by hand.

All company data in this lab (Northstar Studio, people, enquiries, reviews, numbers) is fictional and generated for training.
